

Notes:

1. All associated wiring and light fixture installation is not included in contract unless specified otherwise. See specifications.
2. This is the typical layout for the 2x2 LED system only. If you have another lighting system, refer to their specifications.
3. A clear space of $24\frac{1}{4}"$ is required between the ceiling framing for the installation of the light fixtures. Do not box in the end of the light fixtures in each row.
4. Light fixtures to be installed (by others) after the ceiling panels are installed.
